

#### **Challenges for transferability**

Rune Elvik, Institute of Transport Economics (re@toi.no)

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 633485

6/26/2018

## Where has knowledge been developed and where can it be applied?

- Knowledge about risk factors and road safety measures has been developed in quite few countries
- Almost all the research has been made in high-income countries in Europe, North America and Oceania
- Can knowledge be applied in other countries than those where it was produced?
- This is the transferability challenge

# The belief that all knowledge is local is self-defeating

- If all knowledge is valid locally only, that it is if:
  - It applies only to a single country, or part of a country
  - At a single point in time
- There is no point in publishing the knowledge, because nobody can learn anything from it
- This point of view makes all research pointless and denies the possibility of ever learning from others
- Our view is exactly the opposite: Knowledge has general validity unless specific reasons can be given for thinking otherwise

### Assessing transferability by means of meta-analysis

0

Variables held constant	Comparison with respect to	Categories compared	Percentage change in the number of accidents	95 % confidence interval
Year = 2016; Design = before-after controlling for trend and regression to the mean; Severity = Fatal	Region	Nordic	-64	(-81; -35)
		Rest of Europe	-64	(-80; -33)
		Rest of World	-80	(-89; -62)
Region = Nordic; Design = before-after controlling for trend and regression-to-the-mean; Severity = Fatal	Year	1975	-65	(-81; -36)
		2016	-64	(-81; -35)
Year = 2016; Region = Nordic; Severity = Fatal	Study design	Cross-section	-60	(-79; -27)
		Before-after (§)	-64	(-81; -35)

#### The effects of road lighting are the same in all countries where they have been evaluated

**Replication number** 

40

#### We have assessed transferability

- Each synopsis describing a risk factor or road safety measure contains a section discussing transferability
- If we judge transferability to be limited, that is noted
- The solution if there is limited transferability is obvious:

• Perform research in more countries

0
