

Fatalities and Injuries due to road accidents worldwide 2010 (WHO 2013 and Worldbank/IHME 2014)

- 1.3 million fatalities
- almost 80 million injuries of which 9 million requiring hospital admission
- 50 million (2/3) of the injuries occur in Asia

The problem is increasing in a large part of the world

TRANSPORT FOR HEALTH

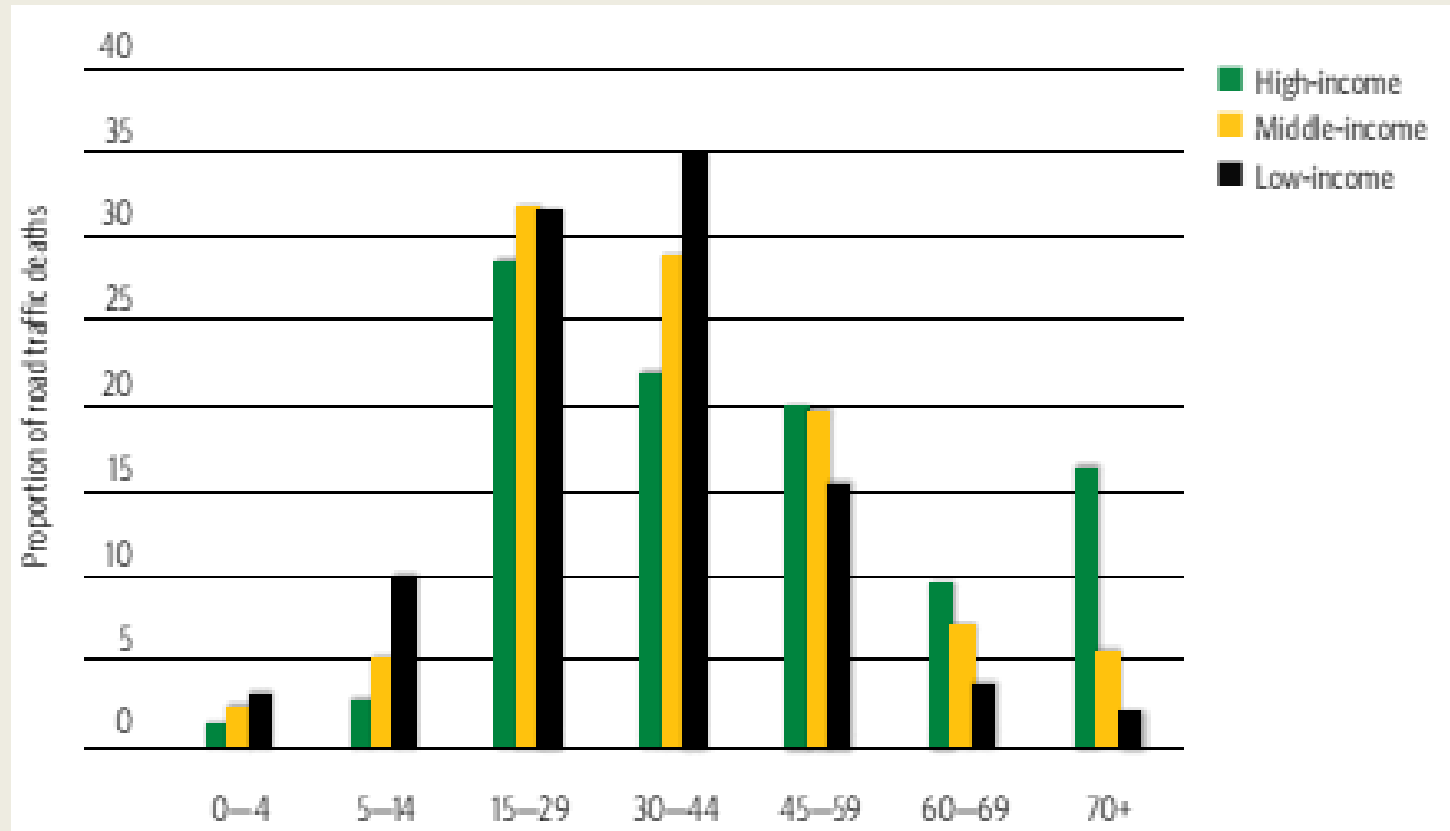

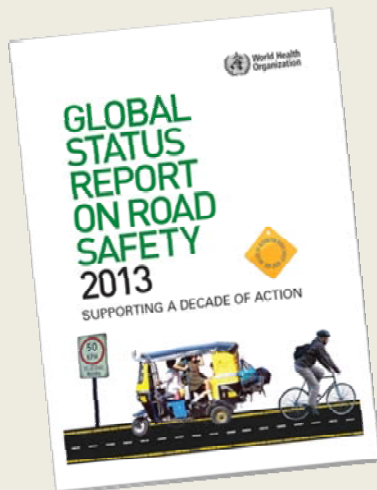

THE GLOBAL BURDEN OF DISEASE FROM MOTORIZED ROAD TRANSPORT

FOREWORD BY
WORLD BANK GROUP PRESIDENT JIM YONG KIM

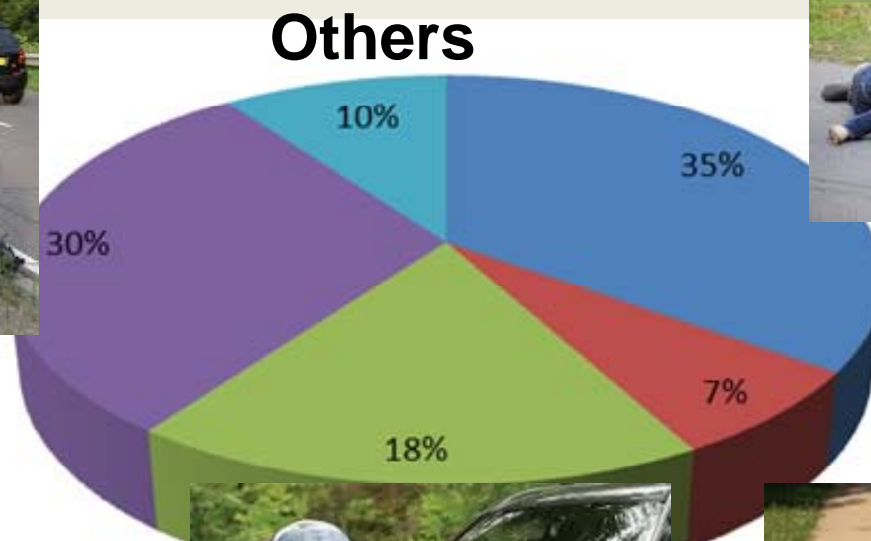

GLOBAL ROAD SAFETY FACILITY THE WORLD BANK GROUP INSTITUTE FOR HEALTH METRICS AND EVALUATION UNIVERSITY OF WASHINGTON

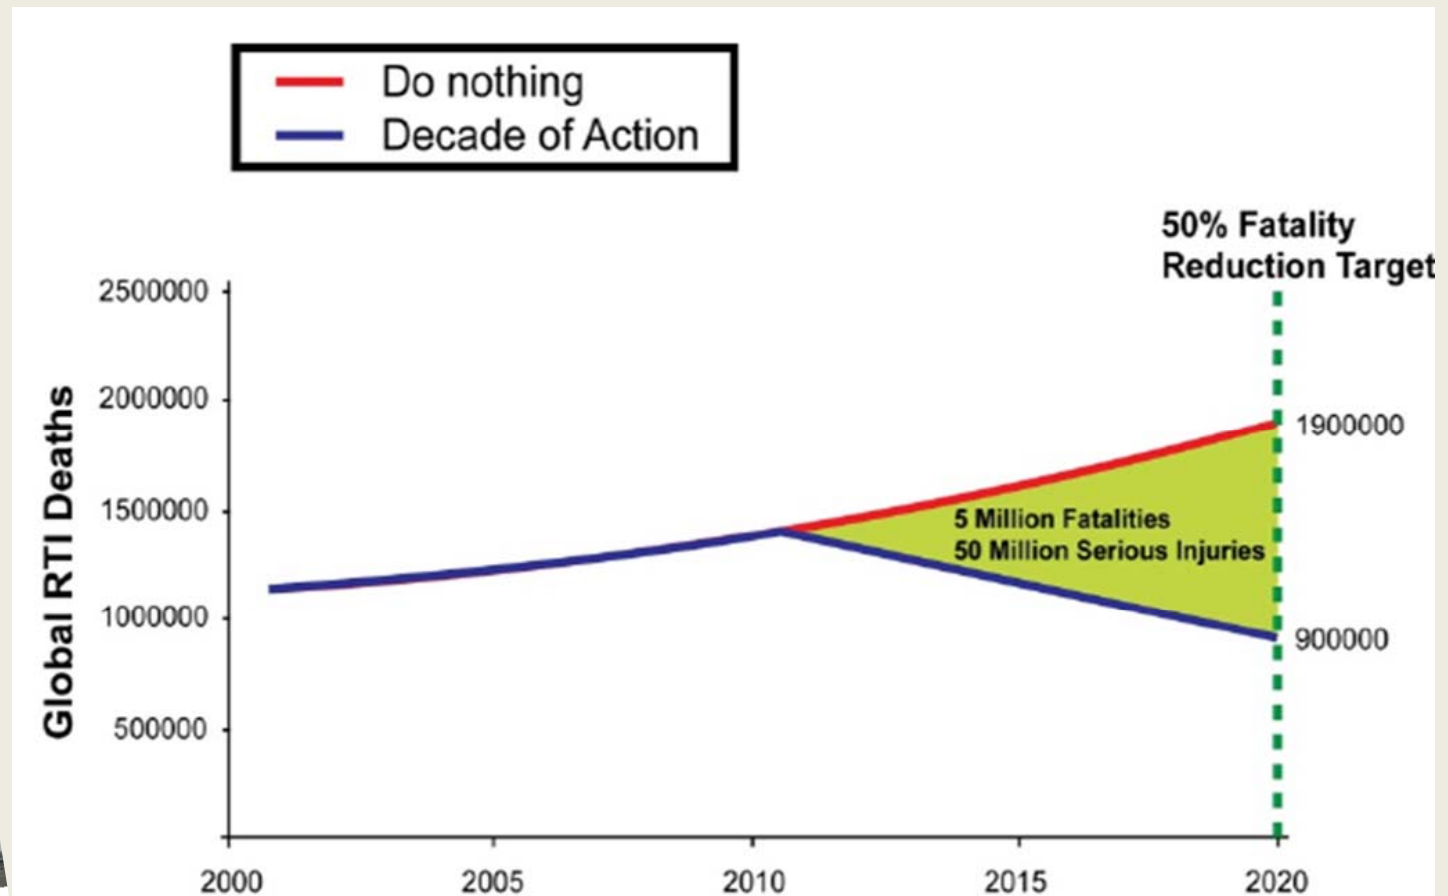

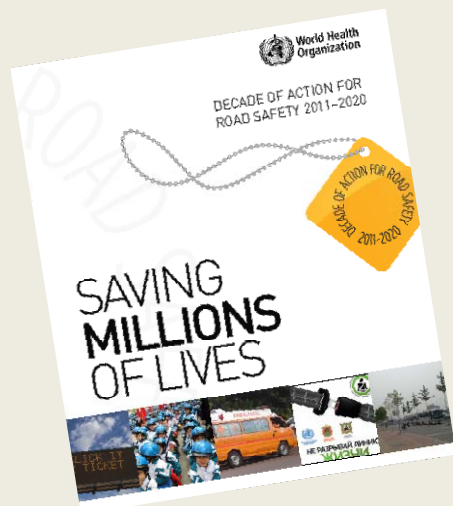

Road accident deaths by age and income status (WHO 2013)

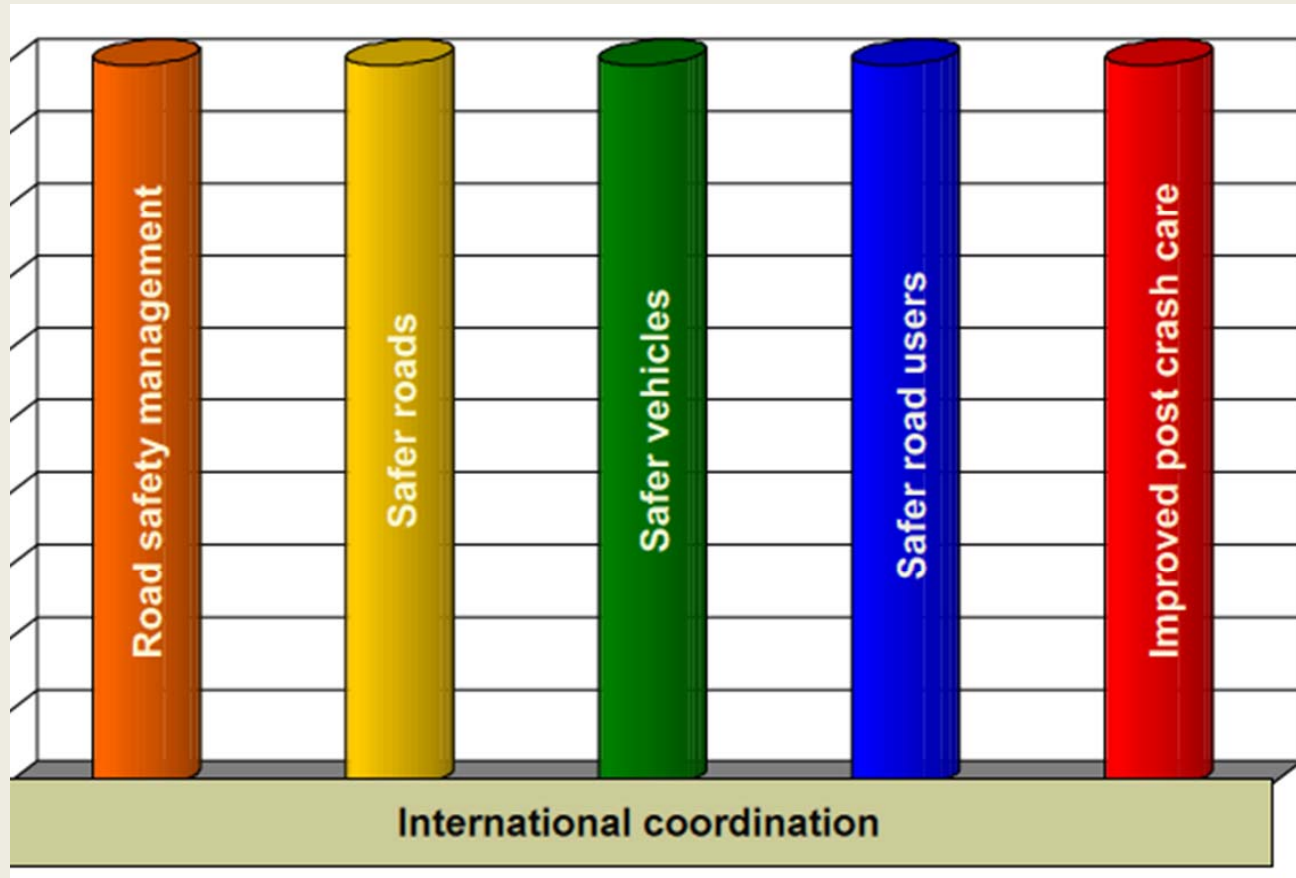

Fatalities in Asia for different modes of road transport

Goal of 2011-2020 Decade of Action for road safety: first stabilize and then reduce.

Plan for the Decade of Action: 5 Pillars (left) and 5 risk factors (right)

- Speed
- Drunk-driving
- Not wearing motorcycle helmets
- Not wearing seat-belts
- Not using child restraints
